LENGTH	3"
SHANK DIAMETER	.130"
HEAD DIAMETER	.250" x .375"
SHANK STYLE	Smooth
APPROX. NAILS PER LB	48.0

Product Description

These Hardened Steel Cut Masonry nails, manufactured by Tremont Nail Co. of Wareham, Mass. (est. 1819), are ideal for attaching wood members to cinder block walls as well as to fresh concrete. The blunt point and tapered shank cause minimal spalling during penetration and offer even greater pull-out resistance than wire masonry nails. 3/4" penetration is recommended for satisfactory holding power. Also recommended for face-nailing hardwood flooring. Use safety glasses when driving any hardened nails.
