<b>HEAD DIAMETER</b>	.250" x .375"
<b>SHANK STYLE</b>	Smooth
<b>COATING</b>	Double Hot-Dip Galvanized
<b>APPROX. NAILS PER LB</b>	48.0

#### Product Description

These nails are designed to attach treated wood sill plates to newly poured concrete. Please note: True hot-dip galvanizing reduces the temper of hardened square cut nails, so it is important that the nails are applied to "green" uncured concrete. Hot-dip galvanized to specification ASTM A-153 to comply with building code requirements. For best results, a drilling hammer is recommended.

Disclaimer: This image represents an entire series of nails, so the length may not be the exact match to the nail in this spec sheet
